Subject: Application for Entry-Level Mechanical Engineer (Production / Maintenance / Design)

Dear Hiring Manager,

I am writing to express my interest in an entry-level position in the Production, Maintenance, or Mechanical Design department of your organization. I am currently pursuing a Diploma in Mechanical Engineering from Kalicharan Nigam Institute of Technology, Banda, and will complete my course in 2025.

Through my academic studies and workshop practice, I have developed a strong foundation in manufacturing processes, mechanical maintenance, and design fundamentals. I have hands-on experience using AutoCAD and SolidWorks for 2D drafting and 3D modeling of mechanical components. Additionally, my exposure to industrial training has helped me understand shop-floor operations, machine safety, and preventive maintenance practices.

I am a self-motivated and disciplined individual with a strong willingness to learn and grow in an industrial environment. I work well in a team, take responsibility seriously, and always aim to improve my technical and practical skills.

I would welcome the opportunity to contribute my knowledge and enthusiasm to your organization while continuing to learn from experienced professionals. Thank you for considering my application. I look forward to the opportunity for an interview.

Sincerely,

Praveen Kumar
