Professional Summary

Motivated and detail-oriented **Diploma Mechanical Engineering fresher** seeking an entry-level opportunity in **Production, Maintenance, or Mechanical Design**. Possesses hands-on workshop experience, sound knowledge of manufacturing processes, machine components, and basic maintenance practices. Eager to contribute to shop-floor efficiency, equipment reliability, and continuous improvement while developing technical and practical skills in an industrial environment.

Core Technical Skills

- **Design & Drafting:** AutoCAD (2D drafting), SolidWorks (basic 3D modeling), T-Flex
- **Manufacturing & Production:** Machining fundamentals, production workflow, material handling
- **Maintenance Engineering:** Preventive maintenance concepts, mechanical troubleshooting, repair support
- **Workshop Practices:** Fitting, drilling, grinding, alignment, hand tools and power tools
- **Metrology:** Vernier caliper, micrometer, measuring gauges (basic understanding)
- **Industrial Safety:** PPE usage, machine safety rules, shop-floor discipline

Academic & Practical Projects

Mechanical Component Design and Drafting Project

- Created detailed 2D drawings of shafts, keys, couplings, brackets, and fasteners using AutoCAD
- Applied standard dimensioning, tolerances, and surface finish symbols
- Gained understanding of manufacturability and component functionality

3D Modeling and Assembly of Machine Elements

- Developed 3D models of gears, bearing housings, pulleys, and bolted assemblies using SolidWorks
- Performed basic assembly constraints to understand motion and fitment
- Improved visualization of mechanical systems and part relationships

Workshop Practice and Maintenance Assistance

- Performed fitting, drilling, tapping, grinding, and basic machine handling operations
- Assisted in minor mechanical repairs and component replacement tasks
- Followed safety procedures and proper tool usage during workshop activities

Production Process and Shop-Floor Study

- Studied end-to-end production workflow including raw material input, machining, and inspection
- Observed quality control checks, preventive maintenance schedules, and 5S practices
- Understood coordination between production, maintenance, and quality teams

Education

Diploma in Mechanical Engineering

2022 – 2025

Kalicharan Nigam Institute of Technology, Banda (U.P.)

High School (CBSE Board)

2020

St. George School, Banda

Industrial Training & Exposure

- Exposure to production machinery, routine maintenance activities, and quality inspection methods
- Learned basic industrial documentation, safety compliance, and teamwork on shop-floor

Key Strengths

- Quick learner with strong interest in mechanical systems and manufacturing processes
- Disciplined, responsible, and safety-focused approach to work
- Good team player with effective communication and coordination skills
- Self-motivated with willingness to learn and adapt in industrial environments

Activities & Interests

- Production systems, manufacturing technology, mechanical repair and design development
- Environmental conservation activities and playing cricket
